

# APPLICATION MIGRATION

ScienceSoft delivers automated migration solutions for cross-platform application and database conversion. We use unique tools and know-hows that minimize migration risks and reduce costs for our clients to a fraction of alternative migration approaches. Our customers come from diverse industries and include Fortune 500 companies.

# WHY MIGRATE SOFTWARE APPLICATION WITH SCIENCESOFT?

## SIGNIFICANT REDUCTION OF THE PROJECT COST

ScienceSoft automated migration reduces the migration project cost by more than 70% compared to the manual conversion.

## MINIMIZATION OF HUMAN ERRORS AND TESTING EFFORTS

In general, manual conversion of software application is a routine and low productive task that leads to high probability of human errors. As a result a lot of efforts are required for testing. Automated solution substantially reduces the influence of human factor and, therefore, testing efforts.

## EASY RE-CONVERSION

During the project, you can modify requirements based on the intermediate results (optimize database access, change UI features etc), and easily re-run the conversion.

## FLEXIBLE SOLUTION

ScienceSoft automated solution is not limited to requirements set up at a start point of the project. These requirements can be changed and accepted during the project.

## FULL-CYCLE MIGRATION

ScienceSoft services cover all the stages of migration process. This means that minimal input from the Customer is required during the project.

## RISK FREE AND QUALITY ASSURED DELIVERABLES

We subject our software application migration solutions to comprehensive testing and validation procedures before delivering the results to the customer. We apply specific quality assurance methodology to ensure smooth and risk free migration process.

## HIGHLY AUTOMATED SOLUTION

~100 percent of conversion is realized automatically. This helps achieve handmade quality while minimizing human errors.

## INDIVIDUALLY TAILORED APPROACH

ScienceSoft team approaches each migration project individually. Individual customization of our tools ensures meeting even very specific code generation requirements and guidelines.

## SUPPORTED PLATFORMS:

Informix 4GL

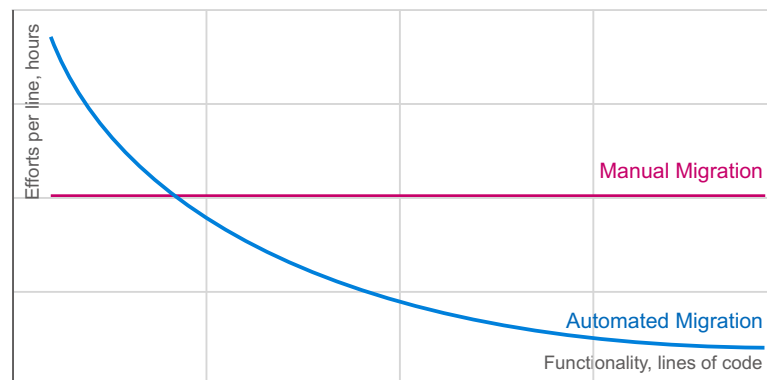

PowerBuilder

Java

Progress 4GL

Microsoft .NET

## AUTOMATED VS. MANUAL MIGRATION

NOTE: with an increase in code lines number, the automated migration approach is becoming increasingly productive and cost-effective.

## FEATURED CUSTOMERS

TietoEnator<sup>TE</sup>

CambridgeSoft<sup>®</sup>  
Life Science Enterprise Solutions

ECInet

MOTIVE SYSTEMS
