ABOUT SCIENCESOFT

ScienceSoft is an established IT services provider with operations in Western Europe, Eastern Europe and South-Eastern Asia. The company's highlights include 450 experienced professionals, ISO 9001 compliant processes and over 25 years of IT business experience. ScienceSoft is a partner of IBM, Microsoft and Oracle.

The offerings of the company embrace custom software development of enterprise and consumer IT systems and applications, IT outsourcing; IT security, business intelligence and ITSM solutions and services. The main technology emphasis of ScienceSoft is on the areas of mobility, Microsoft, Java as well as open source web technologies. ScienceSoft also provides an extensive range of quality assurance services as well as 24x7 support for IT infrastructure and applications.

The global client base of ScienceSoft exceeds two hundred companies and is spread across 25 countries. ScienceSoft's size and flexibility enables it to successfully work with giants such as IBM, Tieto, PerkinElmer and Leo Burnett as well as with SMEs and start-ups such as Viber. The company possesses strong knowledge of vertical domains including banking and finance, healthcare, telecom, manufacturing, media and entertainment, retail and transportation. ScienceSoft holds a number of awards for business excellence, including a national 2014 Fastest-growing company award by Ernst & Young (EY).
